

Stronger backs last longer.

Triad molded rebond provides greater density, fewer seams for outstanding durability.

Molded Rebond Foam Back Pads from HSM Transportation Solutions

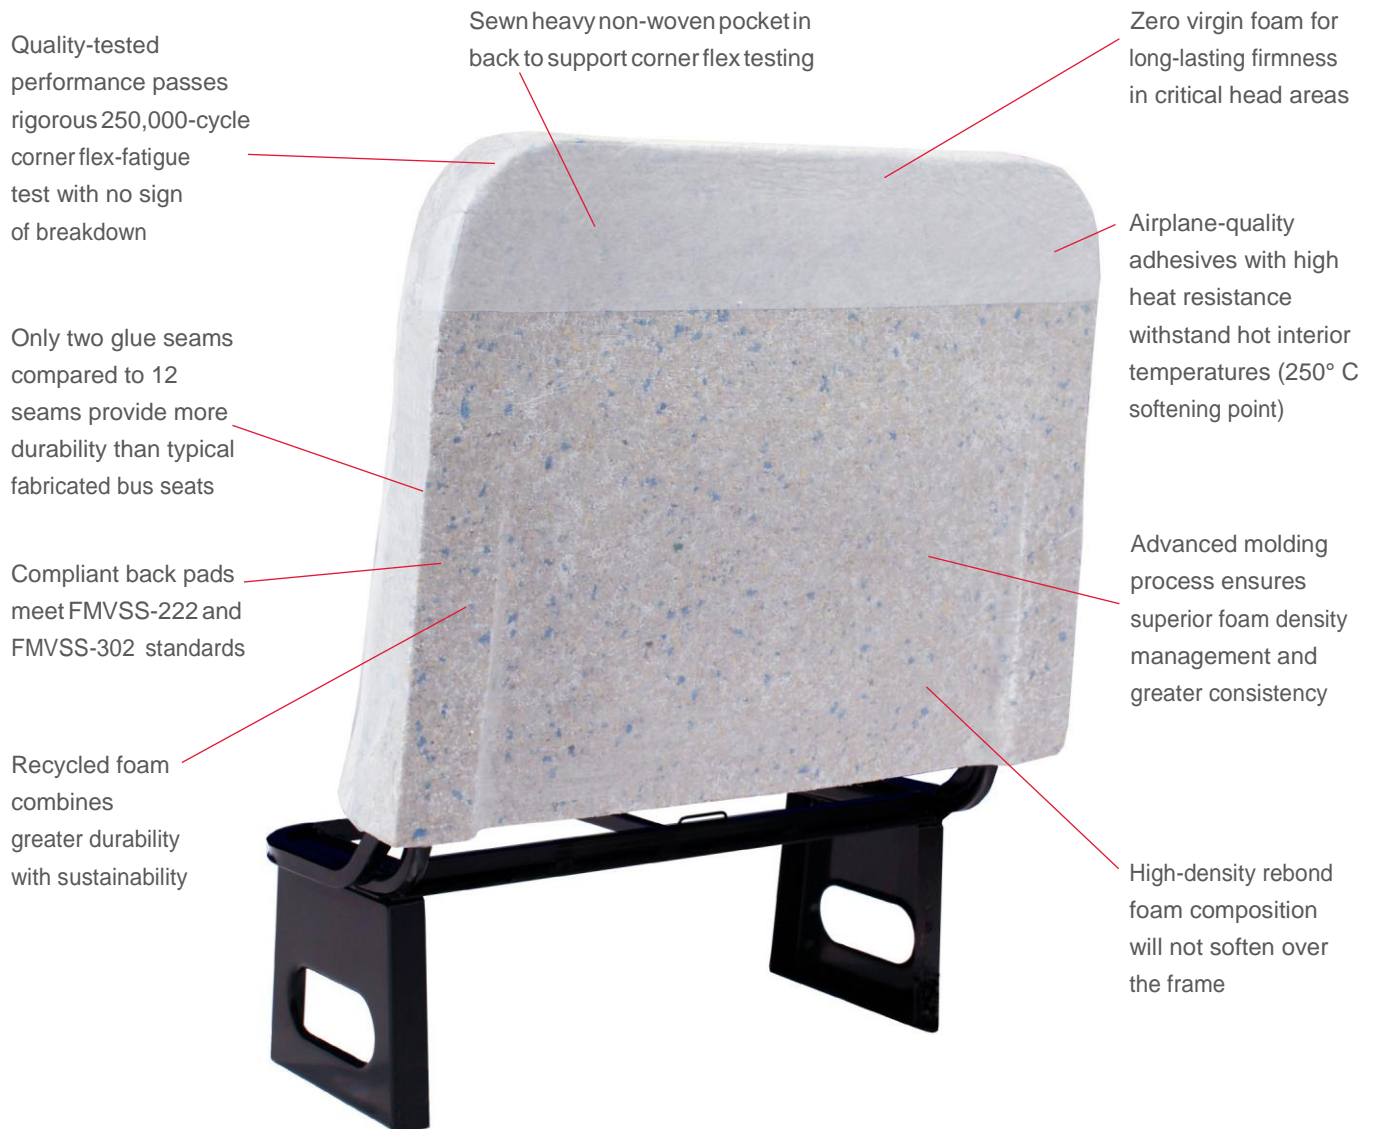

For bus seat back pads that last far longer than typical fabricated construction, go with our advanced molded rebond foam design. Molded rebond foam pads from HSM Transportation Solutions are the smart FMVSS-222 and FMVSS-302 compliant solution for OEM, aftermarket and replacement applications. Plus, you get the support of a knowledgeable team that provides the backing you need to succeed.

Call 800-437-4220 to learn about our capabilities or to request a free rebond sample.
