

A simpler and safer conversion seat for the market.

Featuring fast application in less than five minutes!

Quick.

Easy.

Economical.

The C.E. White Convertible Seat Kit from HSM Transportation Solutions

No cutting or reupholstery is needed thanks to an integral seat back assembly that can be reused to convert the seatback to the original seat. The single frame construction of the seat is not compromised. As a result, no retesting is needed to maintain certifications. And the seat still retains a 15" aisle at the hip.

The C.E. White Convertible Seat Kit.

The best selling base model.

Dependable. Lightweight. Made to fit any type of school bus. Offers all the features you want. With the Convertible Seat Kit, a school bus seat can be transformed to any specialty seat and back again. Single frame construction is not compromised. No re-testing required. Provides fully reusable components in

the field. Meets all FMVSS regulations for school bus seating. It's the easy way to go from a standard school bus seat to a seat with integrated child inserts plus optional lap/shoulder belts—or a seat with lap/shoulder belts or a special security harness—and back to a standard school bus seat.

Seat with integrated child inserts *(two or three lap/shoulder belt options available)*

Seat with 3-point lap/shoulder belts

Seat with special security harness
