EVOS Safety Seat | 3 PT & ICS

Introducing the EVOS Safety Seat. It is the latest edition to the legendary C.E. White family. Driven by an unwavering commitment to passenger protection, the EVOS is redefining the standard for school transportation safety.

Features & Benefits:

- Flexible design with an industry first seat with two Integrated Child Seat inserts and three full-size, three-point seating positions
- Increased service life with the only Seamless Back Foam on the market. Our patented process, eliminates glue seam failure points
- Enhanced comfort and adaptability with cushioning and interchangeable back design for easy seat belt changes
- Exceeds all FMVSS safety standards for school bus seating, adding to peace of mind for school administrators and parents

This groundbreaking product redefines passenger-centric innovation. Contact your HSM representative to learn more.

EVOS

Available in multiple variations to accommodate a wide range of bus designs

EVOS Safety Seat | 3 PT and ICS

Because we care about our shared ecosystem, the EVOS lineup is made from 85% sustainable and 95% recyclable material.

- The seamless back foam has no glue seams to split.
- Our patented foam process firms the foam in critical areas requiring protection and softens it where needed for comfort.
- Its simple structural design and precision manufacturing creates a seat that performs consistently and is a better value alternative when compared to many other seats in the market today.
- Student comfort comes from a thick seat cushion and additional knee clearance from the redesigned back. Even the ICS has been made easier to operate and more comfortable.
- Available in multiple configurations and compatible with almost any type of school bus, our EVOS line meets all FMVSS regulations for school bus seating and safety.
