OEM AFTERMARKET SEATING

Go quickly and safely.

Convenient, innovative fold up case opens up quickly to provide a five-point child restraint.

The C.E. White Portable Child Restraint Seat (PCR) from HSM Transportation

Designed for transporting young children, this innovative PCR provides the best of both worlds: a convenient fold up carrying and storage case when not in use, then it unfolds quickly and easily into a five-point restraint system that meets National Highway Transportation Safety Administration (NHTSA) regulations for children.

Order today! Part Number 900-474

The C.E. White Portable Child Restraint.

Count on these innovative features.

All belts and attachment straps fold conveniently inside the self-contained carrying case

Accommodates children 20 to 90 lbs. and up to 57" height

Meets FMVSS 213

Easy to install and release seat belt adjustment clips.
Part Number 900-474

Vertical shoulder slide height adjustments

Seat behind installed PCR must be left unoccupied or occupants must be belted

Attaches quickly and easily to any school bus seat without requiring a seat belt

Make life easier and safer: Go with the C.E. White PCR system from HSM Transportation

To install, simply place the carrying case on the seat, unfasten the Velcro lip and unfold the case to create a cushioned seat. A belt wraps around the school bus seat and attaches to the PCR, while the built-in five-point harness provides an adjustable restraint system for children from 20 to 90 pounds

When not in use, the seat converts to a self-contained carrying case with an adjustable strap, that creates a handle or shoulder strap which makes it easy to carry, reducing wear and tear and increasing the useful life of the system.
